

Games to play and learn...

Here are some ideas of games you can play with your child to encourage taking turns, understanding instructions and developing their learning in a fun way.

Snap

Each player takes turns to place card in the middle facing their cards up. When the card is the same the players need to call 'snap' and then the player that says it first wins the cards. You continue playing until one player has all the cards.

Bingo

Reveal a sound/number. If you have the sound/number cover it up on your board. When a players board is covered they need to call 'Bingo!'.

Snakes and Ladders

The first player to get to the end is the winner. Can you name the numbers you land on?

Pairs

Cards are all placed faced down. A player turns 2 cards over and if they are a pair the player keeps the cards. If there is no match you turn the cards over and continue playing.

Dominoes

Match the number of dots together. Can you find 2 dots?
